VALUE ADDED COURSES AND SHORT TERM COURSES

The institute offers various value added courses and short term courses to train the students. The purpose of courses is to upgrade the knowledge, enhance the practical skills and train the students for job. The institute have sought permission of parent university for the courses.

A short-term course is a course that can be completed in a short period of time, typically a few days to a few months. Short-term courses are designed to provide practical skills in a specific area and can be taken part-time or as an additional course to a regular academic course.

Short-term courses can be beneficial for a number of reasons, including:

- **Career advancement**

Short-term courses can help you gain specialized skills that are in high demand, which can lead to faster career advancement.

- **Upskilling**

Short-term courses can help you upskill in your career without committing to an extended period of study.

- **Job opportunities**

Short-term courses can help you get jobs, even if you're only taking a few courses.

VALUE ADDED COURSE

REPORT

The department of Chemistry organized fifteen days value added course “**Pickle Making Technician**”. Fifty students from M.Sc. and B.Sc. were participated for this value-added course.

The course was started from 29/01/2024 and it was concluded on 12/02/2024. Every day in the time of 3:00 pm to 5:00 pm. Lectures were delivered on the topics of “**Pickle Making Technician**” as per syllabus.

On 12/02/2024 course was concluded. It was very useful and informative course for all the students. They learned many things for handling, importance of analytical techniques and making the various types of pickles. They also learned the role of different chemicals like preservatives, antioxidant, sweetening agents etc. in the making of pickles, The course also developed their positive attitude and, it was also useful course for their career and future life.

Eventually we concluded the Value added course on 12/02/2024. In this concluding session some students were expressed their opinions about the course. Students were really satisfied and increased their confidence in instrument handling. The department of Chemistry had given certificates to the students those who were actively participated in the value-added course.

Introduction:

The knowledge and abilities required to be an expert in the field of nursery management are provided by this course. Teachers will give lectures and demonstrations, and students will have the chance to practice the skills required for this level of technical workforce. With the use of the standard tools, materials, and equipment used in this course, students will practice and master new skills. This program contains the tasks, abilities, and associated technical expertise required for nurseries. This course will be offered after college hours or over breaks in the semester. By enhancing their careers, this course will help students differentiate themselves in the competitive world of employment market.

Aims of the Course:

- To get familiar with various techniques of propagation in nursery
- To learn and develop necessary skills required for nursery preparation
- To improve skills of performing cutting, layering, grafting and budding
- To practice cultivation methods of important vegetable crops

Syllabus

Learning Objectives:

- > To make students aware about the methods of propagation in nursery
- > To impart knowledge to students about the techniques of propagation in nursery
- > To develop the awareness among students about the roles and responsibilities of a botanical technician in nursery
- > To develop among students the marketing ability of the nursery products

Sr. No.	MODULE- Theory Course	Number of Lectures
1.	Methods of Vegetative Propagation- Introduction, Principles and Techniques of Artificial and Natural methods.	2
2.	Cuttings- Principles and techniques, Types- Stem cutting- Hardwood; Semi-hardwood; Softwood; Herbaceous stem cutting, Leaf cutting, Root cutting.	3
3.	Layering- Principles and techniques, Types- Simple, Compound, Air/ Gooty layering.	2
4.	Grafting –Principles and techniques, Concept of Stock and scion, Types of grafting.	2
5.	Budding –Principles and techniques, Types- T-budding (Shield budding), patch budding, Inverted T-budding and Chip budding.	2
6.	Tissue Culture- Principles and techniques, Micropropagation and application.	2
7.	Sowing/raising of seeds and seedlings and Transplantation of seedlings – Study of cultivation of different vegetables: brinjal, onion, garlic, and tomatoes.	3

8.	Sowing/raising of seeds and seedlings – Practice of Cultivation of tomato	1
	Total	14 Hours

Learning Outcomes:

Students will -

- ❖ - be aware about the importance of Nursery management
- ❖ - be inculcated with the skill and techniques of management of nursery
- ❖ - understand different methods and types of propagation practices
- ❖ - be able to practice methods of cultivation of different vegetables
- ❖ - will come to know about the know-how of the marketing of nursery plants

Introduction:

The “Vedic Mathematics” is called so because of its origin from Vedas. To be more specific, it has originated from “Atharva Vedas”. The fourth Veda, “Atharva Veda” deals with the branches like Engineering, Mathematics, sculpture, Medicine. A Sanskrit word Veda is derived from the root Vid meaning to “know without limit”. The word Veda covers all Veda-Sakhas known to humanity.

Vedic mathematics, which simplifies arithmetic and algebraic operations. Experts suggest that it could be a handy tool for those who need to solve mathematical problems faster. It is an ancient technique, which simplifies multiplication, divisibility, complex numbers, squaring, cubing, square roots and cube roots. Even recurring decimals and auxiliary fractions can be handled by Vedic mathematics. Vedic Mathematics forms part of Jyotish Shastra which is one of the six parts of Vedangas. The Jyotish Shastra or Astronomy is made up of three parts called Skandas. A Skanda means the big branch of a tree shooting out of the trunk.

Given the initial training of Vedic-Mathematics to students from schools and colleges, they will be able to comprehend the logic of solving mathematical problems. It helps to improve mark in competitive exams by reducing time of computations. It is amazing how with the help of 16 Sutras and 13 sub-sutras, the Vedic seers were able to mentally calculate complex mathematical problems.

Aims of the Course:

- To develop analytical thinking.
- To enhance computation skills.
- To improve clarity on mathematical concepts.
- Tricks for quick calculation.

Course Objectives:

- Remove the fear for Mathematics.
- To promote Indian Mathematics.
- To enhance computation skills in students.
- Improve clarity on mathematical concepts.
- To develop analytical thinking in students through Vedic Mathematics.
- Learning becomes easy because of the integrity of the Vedic mathematics subject. Every sutra and upasutra is co-related and uniform. One rule may be applied in different operations.
- Most of the problems solved in mind with a single step which saves time and less number of phase also increase the accuracy.
- Vedic mathematics sutras (aphorisms) are beyond the limitation of calculation.

Course Outcomes:

- It helps a person to solve mathematical problems 10-15 times faster.
- It helps in Intelligent Guessing.

- It reduces burden (need to learn tables up to 9 only)
- It is a magical tool to reduce scratch work and finger counting.
- It increases concentration.
- It helps in reducing silly mistakes

Assessment:

At the end of the course examination is conducted and certificates are issued to the participants.

AIM -

Nowadays, almost all organizations have switched from manual system of accounting to computerized accounting systems and hence an employee who is to be appointed in Finance and Accounts Department is expected to have sufficient knowledge in Computerized Accounting. However, our existing syllabus for B.Com has been included very few components related to computerized accounting. Therefore, this training programme in Computerized Accounting with special importance to TALLY is intended to enable the students to acquire both theoretical and practical training in computerized accounting.

COURSE JUSTIFICATION -

Regular curriculum of university provides theoretical knowledge to students regarding book keeping and accounting, so in addition to that this course focuses on maintenance of accounting using computerized systems and will enable students to practically learn book keeping and accounting procedure. Students will able to maintain books of accounts independently and prepare various reports after completion of this course.

OBJECTIVES -

- 1) Introduce students to basics of accounts and the usage of Tally ERP9 software for accounting purpose.
- 2) Students will work independently on Tally ERP9 accounting software for maintaining books of accounts.
- 3) To enable students to gain skills required for preparation of financial statements via computer.
- 4) Developing students to adapt changing system of maintaining accounts in business environment.
- 5) To enable students to record various transactions having GST and TDS implication and generation of reports through computerized systems.

EXPECTED OUTCOME -

- 1) Students will train to maintain the accounts of any organization after successful completion of course.
- 2) This course will enable Computer literacy among students and they will be able to work independently in Tally ERP9 software.

Department of Commerce

Value added Course - Computerized Accounting
Academic Year 2023-24

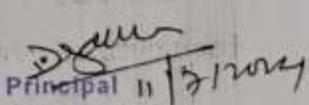

REPORT

The department of Commerce organized fifteen days value added course "COMPUTERISED ACCOUNTING". Sixty seven students from F.Y.B.Com. participated for this value added course.

The course was started from 19/12/2023 and it was concluded on 05/01/2024. Every day in the time of 1:00 pm to 3:00 pm. Lectures were delivered on the topics of "COMPUTERISED ACCOUNTING" as per syllabus.

It was very useful and informative course for all the students. They learned handling Computerized accounting package of TALLY and importance of it in the business organization. The course also developed their accounting skills.

Eventually we concluded the Value added course on 05/01/2024. In this concluding session some students expressed their opinions about the course. Students were really satisfied and increased their confidence in Computerized accounting. The department of Commerce gave certificates to the successful students of value added course.

BROCHURE

Aims of the Course:

- To develop analytical thinking.
- To enhance the knowledge of instrumental analysis.
- To improve skills of performing experiment.
- To develop the knowledge of estimation and analysis.

Course Objectives:

- To give the knowledge to the students about all the instruments.
- To make the students knowledgeable about the handling of the instruments.

- To improve the understanding of students regarding the principles and their applications.
- The student should be able to understand the importance of standardization methods of collection of analytical data and presentation by graphical methods.
- He should be able to learn working of instruments.
- They should be able to create standard curve and prediction of curve.
- To enrich the knowledge of student and make them able to work on National and International level.

Course Outcomes:

- The student should know identifying, quantifying and purifying the individual's components of mixtures.
- They should know about the preparations of standard samples.
- He should know study and identify the functional group and compound.
- The student should know the handling instruments, working and their applications.

 "ANALYTICAL TECHNIQUES IN CHEMISTRY"

SYLLABUS

Theory (10 hrs.)

- 1) **UV- Visible spectroscopy and Infrared spectroscopy. (5L)**
 Introduction, Principles, Theory of Spectrophotometry and colorimetry, Beers Law and Lamberts law, Applications of Beers law, Instrumentations and their applications. Estimations of metal ions from the aqueous solutions. Determinations of pKa value of indicators and compositions of metal complexes using spectrophotometry.
- 2) **P^H metry and Conductometry. (2 L)**
 Introduction, Principles, Instrumentations and their applications.
- 3) **Chromatographic analysis. (3L).**

6

Introduction, Classification, Principles by match box model, Stationary and mobile phase used, Theory of column chromatography and Thin layer chromatography, applications of column and TLC techniques, Numerical.

Practical Syllabus (20 hrs.)

List of Experiments :(any 5)

(20 L)

- 1) Preparations of standard solution sample for the analysis.
- 2) To determine the λ_{\max} and concentration of given KMnO_4 in 2N H_2SO_4 solution.
- 3) To determine the amount of Cu present in given solution of CuSO_4 by colorimetric method using EDTA.
- 4) Estimation of Phosphate from the waste water sample by calibration curve method.
- 5) Identification of functional group in the given organic compounds.
- 6) Identification of given organic compound using IR values and molecular formulas.
- 7) To determine the P^{H} of waste water sample.
- 8) To determine the hardness of water by complex metric titration.

VALUE ADDED COURSE

REPORT

The department of Chemistry organized fifteen days value added course "INSTRUMENTAL TECHNIQUES IN CHEMISTRY". Fifty students from T.Y.B.Sc. was participated for this value added course.

The course was started from 30/12/2022 and it was concluded on 17/01/2023. Every day in the time of 3:00 pm to 5:00 pm. Lectures were delivered on the topics of "INSTRUMENTAL TECHNIQUES IN CHEMISTRY" as per syllabus.

On 17/01/203 course was concluded. In this course fifty students from T.Y.B.Sc. were participated. It was very useful and informative course for all the students. They learned many things for handling and importance of analytical techniques and instrumental methods of analysis. The course also developed their positive attitude and, it was also useful course for their career and future life.

Eventually we concluded the Value added course on 17/0/2023. In this concluding session some students were expressed their opinions about the course. Students were really satisfied and increased their confidence in instrument handling. The department of Chemistry had given certificates to the students those who were actively participated in the value added course.

Short Term Course On 'Vedic Mathematics'

Course Details:

Title of Course	: Short term Course on Vedic Mathematics
Course Duration	: 8 th March 2023 to 25 th March 2023
Course Code	: JVM001
Name of Coordinator	: Dr. S. G. Purane
Level	: Certificate
Eligibility	: 10+2 Any Stream
Admission Criterion	: First cum First Serve
Medium	: English/Marathi
Duration	: 30 Hours.
Intake Capacity	: 60
No. of Beneficiary	: 20

Introduction:

The "Vedic Mathematics" is called so because of its origin from Vedas. To be more specific, it has originated from "Atharva Vedas". The fourth Veda, "Atharva Veda" deals with the branches like Engineering, Mathematics, sculpture, Medicine. A Sanskrit word Veda is derived from the root Vid meaning to "know without limit". The word Veda covers all Veda-Sakhas known to humanity.

Vedic mathematics, which simplifies arithmetic and algebraic operations. Experts suggest that it could be a handy tool for those who need to solve mathematical problems faster. It is an ancient technique, which simplifies multiplication, divisibility, complex numbers, squaring, cubing, square roots and cube roots. Even recurring decimals and auxiliary fractions can be handled by Vedic mathematics. Vedic Mathematics forms part of Jyotish Shastra which is one of the six parts of Vedangas. The Jyotish Shastra or Astronomy is made up of three parts called Skandas. A Skanda means the big branch of a tree shooting out of the trunk.

Given the initial training of Vedic-Mathematics to students from schools and colleges, they will be able to comprehend the logic of solving mathematical problems. It helps to improve mark in competitive exams by reducing time of computations. It is amazing how with the help of 16 Sutras and 13 sub-sutras, the Vedic seers were able to mentally calculate complex mathematical problems.

Aims of the Course:

- To develop analytical thinking.
- To enhance computation skills.
- To improve clarity on mathematical concepts.
- Tricks for quick calculation.

Course Objectives:

- Remove the fear for Mathematics.
- To promote Indian Mathematics.
- To enhance computation skills in students.
- Improve clarity on mathematical concepts.
- To develop analytical thinking in students through Vedic Mathematics.
- Learning becomes easy because of the integrity of the Vedic mathematics subject. Every sutra and upasutra is co-related and uniform. One rule may be applied in different operations.
- Most of the problems solved in mind with a single step which saves time and less number of phase also increase the accuracy.
- Vedic mathematics sutras (aphorisms) are beyond the limitation of calculation.

Course Outcomes:

- It helps a person to solve mathematical problems 10-15 times faster.
- It helps in Intelligent Guessing.

- It reduces burden (need to learn tables up to 9 only)
- It is a magical tool to reduce scratch work and finger counting.
- It increases concentration.
- It helps in reducing silly mistakes

Assessment:

At the end of the course examination is conducted and certificates are issued to the participants.

STRUCTURE AND SYLLABUS

Objectives:

1. To build Self- Confidence and self –Esteem of students.
2. To develop certain positive trends in personality.
3. To know proper behavior in formal and informal circumstances.
4. To develop skills of interview techniques.
5. To develop effective communication Skills
6. To develop Presentation Skills.

Learning Outcomes:

After the completion of course, the students will be able to:- Improve their soft skills and English Speaking ability. It was very useful course for all students. They have learned many things from this course such as the improvement of their Skills, particularly Presentation Skills, interview skills, leadership skills, Body language, Communication Skills, Time Management, etc. The course also has developed their positive attitude and, it was also useful for their career and future life.

Course justification -

The university curriculum provides the knowledge to the students. so in addition to that this course focuses on improve their soft skill from this course such as the improvement of their Skills, particularly Presentation Skills, interview skills, leadership skills, Body language, Communication Skills, Time Management, etc. so Students are increase their confidence in every skill.

**Eligibility:**

AIM -

Nowadays, almost all organizations have switched from manual system of accounting to computerized accounting systems and hence an employee who is to be appointed in Finance and Accounts Department is expected to have sufficient knowledge in Computerized Accounting. However, our existing syllabus for B.Com has been included very few components related to computerized accounting. Therefore, this training programme in Computerized Accounting with special importance to TALLY is intended to enable the students to acquire both theoretical and practical training in computerized accounting.

COURSE JUSTIFICATION -

Regular curriculum of university provides theoretical knowledge to students regarding book keeping and accounting, so in addition to that this course focuses on maintenance of accounting using computerized systems and will enable students to practically learn book keeping and accounting procedure. Students will able to maintain books of accounts independently and prepare various reports after completion of this course.

OBJECTIVES -

- 1) Introduce students to basics of accounts and the usage of Tally ERP9 software for accounting purpose.
- 2) Students will work independently on Tally ERP9 accounting software for maintaining books of accounts.
- 3) To enable students to gain skills required for preparation of financial statements via computer.
- 4) Developing students to adapt changing system of maintaining accounts in business environment.
- 5) To enable students to record various transactions having GST and TDS implication and generation of reports through computerized systems.

EXPECTED OUTCOME -

- 1) Students will train to maintain the accounts of any organization after successful completion of course.
- 2) This course will enable Computer literacy among students and they will be able to work independently in Tally ERP9 software.
